#### **4. First-aid-steps**

Due to the low concentration of chemicals and the chromatographic nature of the assay personal damages are extremely unlikely if the test is done according to the instructions. So far no injuries have been reported that could be linked to the use of the lateral flow immunoassay. For safety reasons general First Aid measures for chemical substances will be listed nevertheless.

<b>Inhalation:</b>	Remove source of exposure; take person outside at fresh air
<b>Skin contact:</b>	Remove source of exposure; wash affected area with water
<b>Eye contact:</b>	Remove source of exposure; wash with copious amounts of water
<b>Ingestion:</b>	Drink copious amounts of water
<b>General advice:</b>	If irritation or signs of toxicity occur, seek medical attention

#### **5. Fire and Explosion Hazard Data**
